CP26 DEGREASANT (WASHING AGENT)

INFORMATION SHEET

CP26 Degreasant is used as a washing agent for mammals and bird skins, after fleshing and before tanning.

Soak fleshed skins in cold water thoroughly and drain. Put 1 dessert spoon full of Degreasant per 2 gallons of warm/hot water and agitate to disperse the Degreasant. The water should not be hotter than you can hold your hand in comfortably.

Wash the skins in this solution for several minutes. Follow by rinsing in warm/cool water. Immerse in tan solution for mammal skins or apply Preservative CP2 or CP3 in the case of bird skins.

When washing bird skins which have been treated with Grease Solve CP10, the Grease Solve will be removed in the first soak. Add Degreasant to the water as directed above for the wash. Rinse well after washing. Use Rubber Gloves PC13 when using Degreasant.

WARNING: DO NOT USE THIS PRODUCT FOR DEGREASING FISH SKINS.
